

Silkroad® **Bamboo Flooring**

COMPOSITE BAMBOO FLOORING

OUR TOUGHEST BAMBOO FLOOR!

The manufacturing and processing techniques used in this new product makes Silkroad® **COMPOSITE** bamboo flooring much harder than traditional bamboo flooring. It's much harder, durable, and moisture-resistant. **THE IDEAL BAMBOO FLOOR FOR HIGH-TRAFFIC RESIDENTIAL AND COMMERCIAL SITUATIONS.**

Manufacturing Procedures:

Similar in manufacture to OSB (Oriented Strand Board). Bamboo shavings are mixed into a glue matrix, creating a very dense plank. This produces a floor that is even harder and denser than traditional bamboo flooring, with a grain more similar to hardwood flooring.

Specifications:

Colours: Carbonized & Natural

Dimensions: 1/2" x 3-5/8" x 36"

Hardness: 2600 psi

Contents: 100% Bamboo
